Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner informed applicant's representative that the IDS filed 12-11-03 has been considered. Discussed Heinen's disclosure regarding pitch P1 and figure 7 (peaks and valleys on one side being 180 degrees out of phase with peaks and valleys on the other side). Discussed applicant's arguments on page 3 of the response filed 10-31-05. Examiner proposed amendment to claim 1 to place case in condition for allowance over prior art of record including Heinen. Examiner proposed amending the specification to provide literal antecedent basis for the proposed claim 1 amendment and noted that the subject matter of "the spacing between the projections is greater than the width of the projections" is reasonably conveyed by the original disclosure including original figures. Examiner also proposed title change and drawing change to correspond to the specification change filed 10-31-05. Applicant's representative agreed to the changes in the examiner's amendment.
